

Map

Everyday Life - directions for use 1 ⓘ

Across 2,300 m² of exhibition space, this varied permanent exhibition looks at the preconceptions of everyday life, focussing on people and technology. »

Screw-in sockets with bulb socket, around 1920

The screw-in socket also used to be called an "electricity thief". It enabled the use of the so-called "lighting current" for other purposes without payment.

AT WORK ⓘ

The exhibition on the dynamics of working life. »

Inventory No. 1938 ⓘ

Provenance research at the Vienna Technical Museum.

»

mini mobil ⓘ

Indeed, due to the strong demand, the interactive area for our youngest visitors to the Museum has just been expanded. After a restructuring phase of several weeks, you now have more than 600 m² of interactive space to find out all there is to know about the exciting topic of mobility.
